MORE TYPES OF COLD PRESSED SINTERED BLADES

Designed for general purpose of cutting granite, marble, engineering bricks, concrete and masonry materials.

Different types of blades can be customised by clients' needs.

Designed for cutting granite, marble, especially for cutting tiles and ceramic, etc. Hot pressed sintered guarantee blades with better life and cutting.

Features:

Hot pressed sintered, fast cutting and longer life.

Application:

Tile, ceramic, porcelain.

Machinery:

Tile saw, bevel-tole saw, angle grinder and circular saw.

Different arbor sizes and segment specifications are acceptable upon clients' request.

20"	500	1",2"	25.4/50	10 / 12 MM	35

Features

The U-Slot gullet design allows for quick and efficient debris removal to provide fast cutting action and prevent segments loss.

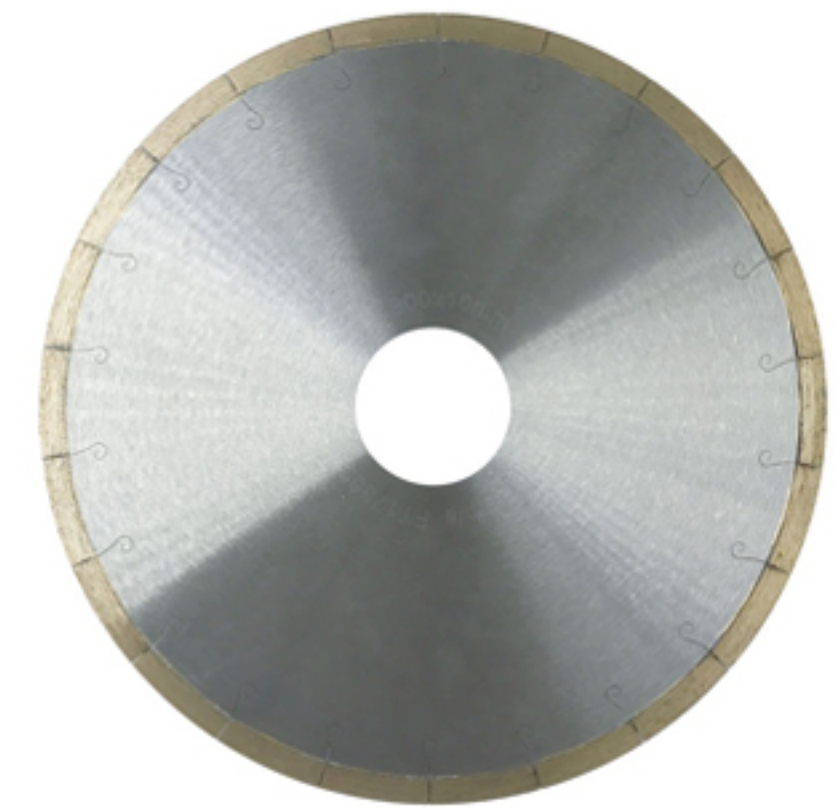

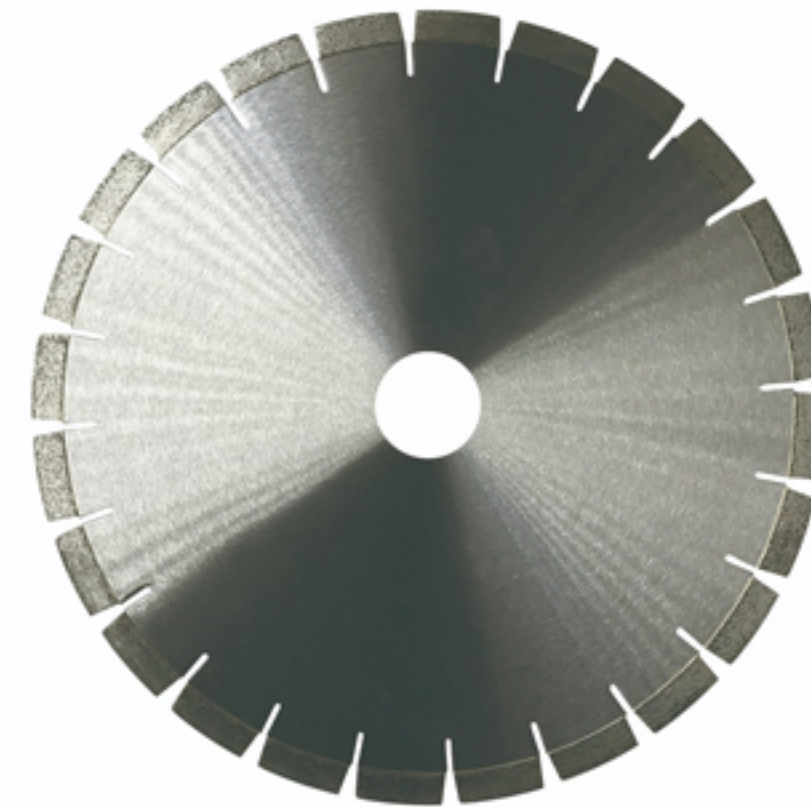

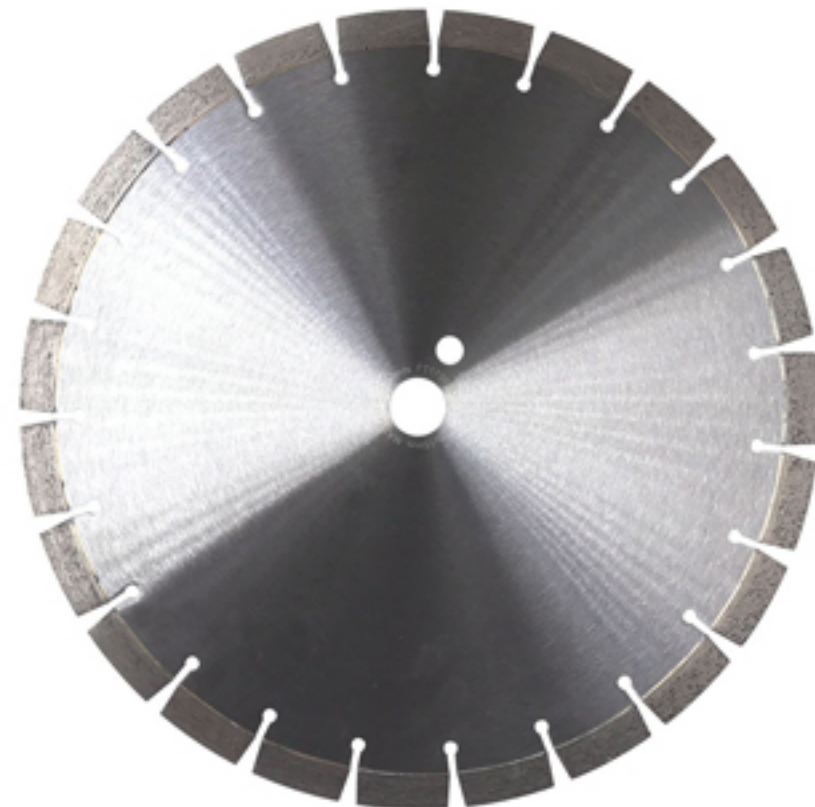

Application

For cutting asphalt, green concrete.

Machinery

High speed saw, walk behind saw

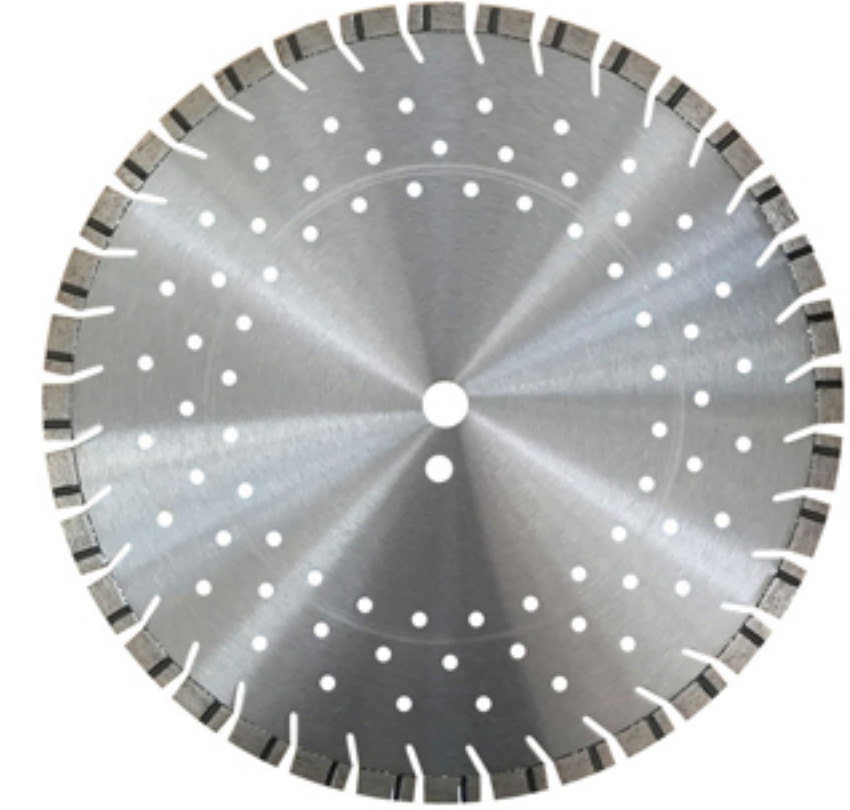

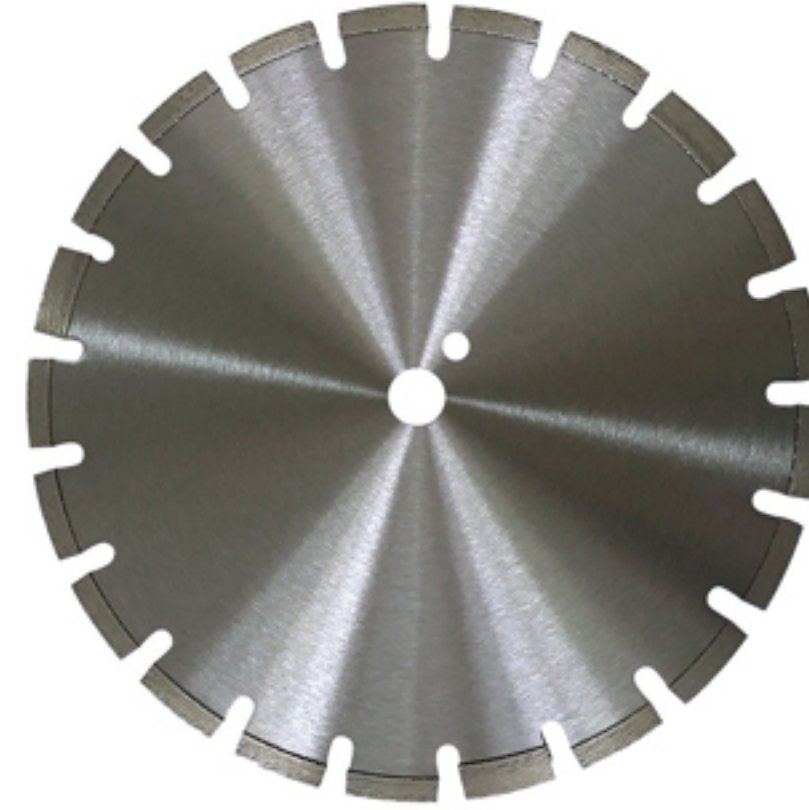

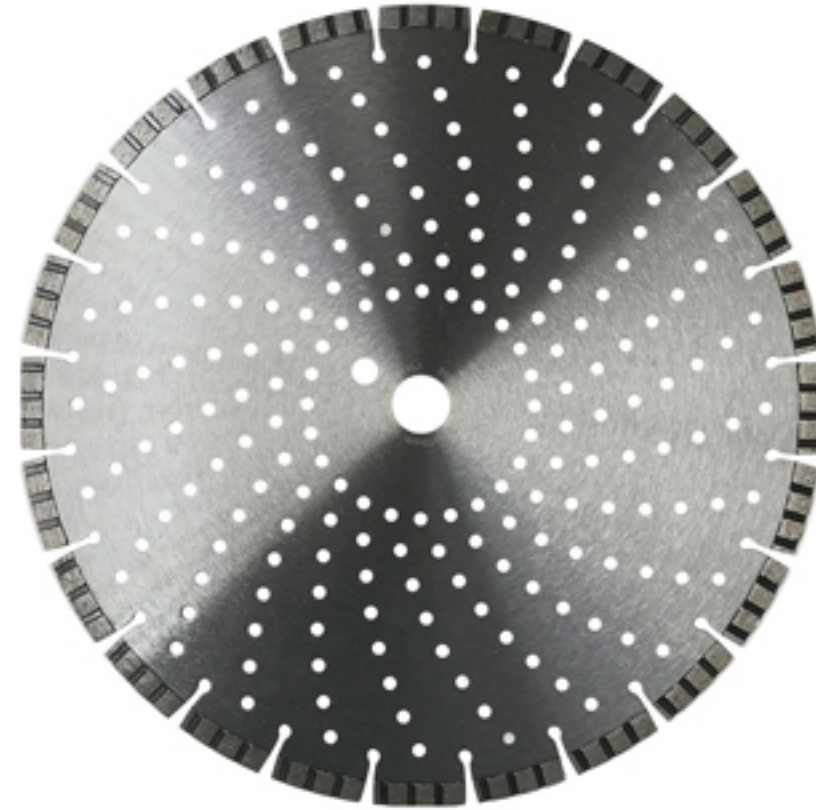

Different arbor sizes and segment specifications are acceptable upon clients' request.

For concrete, reinforced concrete, bricks, granite and various kinds of construction materials . The laser welded process and tough segment design provide for exceptional performance and high productivity.

Different arbor sizes and segment specifications are acceptable upon clients' request.

Application: For grinding and polishing granite,marble,concrete,other concrete products,masonry materials and all types of natural stone.

Diameter: 100MM / 115MM / 125MM / 150MM / 180MM / 230MM

Thread: M14, 5/8", 22.23MM arbor size

Diamond segment height: 5MM/8MM

Different segment types can be customised upon client's request.
